"Not Only Filmmakers, Every Human Being Breathes Stories": Bogdan Mureșanu at IFFI Masterclass

CHENNAI – 25 Nov, 2026 Every story carries a fragment of reality, just as every memory holds the possibility of fiction. Exploring this intricate space between lived experience and cinematic imagination, acclaimed Romanian writer-director and producer Bogdan Mureșanu conducted an engaging masterclass titled 'The Thin Borders Between the Reality and Fiction' at the 57th International Film Festival of India (IFFI) in Goa today.

Addressing an enthusiastic gathering of cinephiles, students and film professionals, Mureșanu shared insightful reflections on why storytelling is intrinsic to human existence and how narratives help us comprehend the world. Emphasising that storytelling is not the exclusive domain of artists, he observed that from everyday anecdotes shared among friends to stories told through cinema, narratives allow us to explore possible realities and recharge our spirit.
