Hackers breach U.S. Air Force flagship Cloud One computing platform

CHENNAI – 28 Nov, 2026 Hackers have breached the U.S. Air Force's flagship cloud computing platform, three people familiar with the matter told, in a development that could jeopardize a vast swathe of sensitive tactical, personnel and logistics data.

The intrusion at Cloud One was discovered within the past month or so during work to upgrade the system, two of the people said, adding that the discovery has led to disruption across the platform. could not establish the identity of the hackers, the full scope of the intrusion or whether any data had been stolen.

In a statement to, the Air Force said it "does not comment on the security posture, vulnerabilities or operational status of specific networks and systems. We continuously take prudent measures to protect Department (of the Air Force) information, systems and mission capabilities."

Initiated in 2017, Cloud One was meant to serve as a one-stop shop for the Air Force's IT needs, combining the resources of four operators — Microsoft,

Amazon, Oracle and Alphabet — to power scores of applications including ones that manage personnel data and pay or logistics and maintenance.
