

Infosys Foundation Enables over 2.5 Lakh Job Offers Across India Through Infosys Springboard Livelihood Program

Bangalore, 14 Oct 2026: Infosys Foundation, the philanthropic and CSR arm of Infosys, today announced that the Infosys Springboard Livelihood Program has enabled more than 2.5 lakh job offers across India, marking the halfway milestone towards its aspiration of creating half a million job opportunities in India by 2030. This reflects the Foundation's commitment to creating sustainable livelihoods through industry-relevant skilling, employment pathways, and strong ecosystem partnerships.

Since its launch last year, the Infosys Springboard Livelihood Program has enabled employment opportunities for youngsters through a network of 20 implementation partners, including Nirmaan Organization, ICT Academy, Magic Bus, Centum Foundation and Aga Khan Rural Support Programme (India).

The program has enabled more than 1.17 lakh job offers for graduates and over 96,000 job offers for undergraduates, helping bridge the gap between education and employment. The program has also enabled more than 1.25 lakh job offers for women and for over 1000 Persons with Disabilities (PwD), reinforcing Infosys Foundation's commitment to creating inclusive and equitable livelihood opportunities. Infosys Foundation collaborated with AssisTech Foundation (ATF) for the employment platform and will work with The Association of People with Disability (APD) to expand access to career opportunities for people with disabilities.
