

Revivo Clinic Launches Type II Diabetes Remission Programme

Chennai, 27 Oct 2026: Revivo Clinic, a Chennai-based centre specialising in obesity, diabetes and metabolic health, has launched its Type II Diabetes Remission Programme ahead of the World Diabetes Day observed on November 14. The initiative emphasises an evidence-based metabolic healthcare, prioritising clinical suit ability and sustainable outcomes over a one-size-fits-all approach.

The programme was formally inaugurated by Dr. Soumiya Anbumani, Member of the Tamil Nadu Legislative Assembly. Dr. Arun Raghavan, Diabetologist, Metabolic Physician and Co-Founder of Revivo Clinic presented the programme and outlined its key features.

A key distinguishing feature of Revivo Clinic's Remission Program is its structured clinical evaluation, through which, each individual's eligibility and the likelihood of achieving remission is assessed first before enrolment. Patients who are not eligible for the program will be advised appropriate, evidence-based diabetes management.

The physician-led programme combines medical care, personalised nutrition, physical activity and lifestyle interventions, supported by regular monitoring of clinical outcomes.

At the launch of the programme, Dr. Soumiya Anbumani, Member of the Tamil Nadu Legislative Assembly, said, “Congratulations to the entire team at Revivo Clinic on the launch of their flagship programme. At a time when India is already the Diabetic Capital of the world, Revivo Clinic is working to change how people approach the disease by emphasising early detection, sustained treatment and healthier lifestyle choices, including clean eating. Their efforts to help people manage and potentially reverse Type 2 diabetes through long-term lifestyle changes are commendable.

I wish the entire team continued success in trans forming lives and making a lasting difference.”
