If this is the only time you pay attention to your cover, though, you could be overlooking benefits that are useful well before any suchevent.

At its core, health insurance continues to be about financial protection when medical treatment is needed. That remains unchanged. The difference today is that many policies may also

Depending on the policy you hold, these could include annual health check-ups, tele consultations, wellness programmes, fitness-linked benefits or support for those managing chronic conditions. Not all policies carry every one of these, and the terms vary. But where such benefits exist, they give policyholders one more reason to engage with their cover through the year, and not just in an emergency.

The first step is a simple one: understand what your policy actually provides.

At the time of purchase, it is natural for most buyers to

Through mobile apps and digital healthcare platforms, consumers may be able to book consultations, access health assessments, get reminders or use well ness services without leaving home.

This convenience can make a real difference for a working professional or a family balancing several responsibilities. At the same time, one should not assume that every service shown on an app automatically forms part of the insurance cover. Consumers still need to know what their specific policy includes.

It is also worth taking a fresh look at your policy every so often.

CLEAN ISN'T ALWAYS HYGIENIC: A DOCTOR'S FESTIVE CHECKLIST FOR HOMES

Chennai, 28 Oct spray response may not G e l - b a s e d

2026: The festive always solve the cockroach control is season usually begins deeper issue. Cleaning useful because it is with a deep clean. helps reduce crumbs, applied in small, Kitchens are emptied, moisture, and clutter, targeted amounts in shelves are wiped, but it does not always likely movement zones such as cabinet and homes are zones where cock corners, under sinks, prepared for family roaches hide and breed. behind the refrigerator, gatherings and guests. and near plumbing lines. Unlike a format designed mainly for quick visible action, dependa ble gel products such as HIT anti-roach gel is meant to work inside the hidden movement pathways cockroaches use every day. Cock roaches feed on the gel and carry its effect back into the nesting area, allowing the treatment to work beyond the insect that is immediately visible.

2. Cockroaches are a household hygiene risk, not just a bad sight

Cockroaches can carry contaminants from dirty areas onto kitchen platforms, utensils, storage spaces, and food-contact surfaces. Their droppings and shed particles can also aggravate allergies in sensitive individuals. In homes with children, where surfaces are touched often and food is frequently handled or left within easy reach, that risk becomes more important to manage.

3. Festive cooking creates exactly the conditions cock roaches look for

This is the season of extra groceries, open containers, late-night kitchen use, sweet spills, and bins filling up faster than usual. Even a clean home can become more attractive to cockroaches if food, moisture, and hidden access points come together. That is why festive hygiene is not only about making the home look clean, but also about reducing what quietly draws pests in.

4. Gel-based control works where hidden activity begins

1. The cockroaches you see are rarely the full problem

A visible cockroach is often only a small sign of a larger hidden infestation. Much of the activity usually stays tucked away in cabinet joints, behind appliances, under sinks, around drains, and near pipe gaps. This is also why a visible kill, or a quick

5. It helps tackle the colony, not just the sighting

One of the biggest advantages of gel is that it is designed to work through the infestation itself. By reaching the nesting area through the cock roach's own movement, it can affect more than a single insect at a time. For households, this makes it a more strategic option during festive preparation, when repeated disruption is the last thing anyone wants.

6. It suits busy festive homes because it is discreet and convenient

During the festive quarter, kitchens are active and guests are expected. Gel-based formats are typically

7. Timing matters more than people realise

The best time to act is before celebrations peak. Festive cleaning often reveals the exact places where cock roach activity has been hiding, especially when appliances are moved and cupboards are emptied. Applying gel-based control early gives it time to work in the background while households move into the busiest part of the season.

A festive-ready home is not defined only by polished floors and organised shelves. It is also defined by cleaner food spaces, better hidden hygiene, and fewer conditions that allow contamination to build unnoticed. This festive season, the smartest clean-up may be the one that goes beyond what is visible.

SIGMA ADVANCED SYSTEMS SECURES INR 973 CRORES ORDER FOR BASE BLEED UNITS OF 155MM ARTILLERY AMMUNITION

Chennai, 28 Oct defence manufacturing

2 0 2 6 : S i g m a capabilities, the Advanced Systems addition of Base Bleed Units builds on its order valued at USD existing capabilities in 102.23 million (INR 155 mm artillery shells and fuzes. This manufacture and progression reflects the supply of Base Bleed company's strategy to deepen its manufac turing expertise, expand its product portfolio and develop a more integrated offering for the global artillery ammunition market.

A Base Bleed Unit is a specialised ammunition component designed to improve the aerodynamic performance of artillery projectiles and extend their effective range. Integrated into the rear section of an artillery shell, the unit generates a controlled flow of gas during flight, reducing the aerodynamic drag caused by the low-pressure region behind the projectile. Base Bleed technology is widely used in modern 155 mm artillery ammunition and plays an important role in enhancing the range and operational effectiveness of long-range artillery systems.

The order strengthens Sigma's position within the artillery ammunition manufacturing ecosystem and represents another step towards establishing comprehensive in-house manufacturing capabilities for advanced 155 mm artillery ammunition.

As Sigma continues to strengthen its

NEUBERG ANAND LAUNCHES SIX WELLNESS CENTRES IN BENGALURU WITH MS DHONI

Chennai, 28 Oct 2026: Neuberg Anand Health Checkups, in association with NM Medical, launched six Comprehensive Health Checkup and Wellness Centres at Shivaji Nagar, Old Airport Road, Kasturi Nagar, HSR, Electronic City and Whitefield, in the presence of MS Dhoni at Taj West End, Bengaluru. The centres integrate radiology, pathology, cardiology, gastroenterology, dental care, ophthalmology, audiometry and genomics to support personalised healthcare, preventive screening, early diagnosis and predictive wellness. Neuberg also announced the pre-launch of Atlas Longevity, an initiative focused on personalised health insights,

healthy ageing and long-term wellbeing.

During an interactive session, MS Dhoni highlighted the importance of regular health checkups, fitness and understanding one's health as one grows older. He emphasised consistency, listening to the body and taking timely preventive measures. Speaking about his IPL future, he indicated that his decision to play another season would depend on his fitness and medical assessments. Dr GSK Velu, Founder, Chairman & Managing Director, Neuberg Diagnostics, said the initiative aims to identify health risks early and make predictive, preventive and personalised wellness more accessible.

Dr Sujay Prasad, Chief Medical Director, Neuberg Diagnostics, highlighted the role of advanced pathology, genomics and integrated clinical specialties in personalised risk prediction and early diagnosis.

Dr Nilesh Shah, Chairman, NM Medical, Mumbai, said the collaboration combines NM Medical's three decades of experience in comprehensive health checkups with Neuberg Anand's expertise in pathology, genomics and integrated diagnostics to deliver next-

CONCLUSION OF 33rd EDITION OF SINGAPORE-INDIA MARITIME BILATERAL EXERCISE (SIMBEX-2026)

Chennai, 28 Oct 2026: The 33rd edition of the Singapore-India Maritime Bilateral Exercise (SIMBEX-2026), hosted by the Indian Navy at Visakhapatnam, concluded on 26 Oct 2026. The exercise further strengthened the long standing maritime cooperation and operational engagement between the Indian Navy and the Republic of Singapore Navy (RSN).

meeting provided an opportunity to discuss matters of mutual interest.

SIMBEX-2026 was conducted in two phases. The Harbour Phase featured Subject Matter Expert Exchanges (SMEEs), cross-

deck visits, professional interactions, sporting engagements and planning conferences, facilitating the exchange of operational knowledge and enhancing mutual understanding. The Sea Phase in the Bay of Bengal involved Maritime Interdiction Operations, Anti-

Submarine Warfare (ASW), Anti-Air Warfare and Anti-Surface Warfare drills, seamanship evolutions and cross-deck flying operations, enhancing coordination and interoperability between the participating forces.

The exercise witnessed the participation of RSN ship RSS Supreme, a Formidable-class

stealth frigate with an embarked SH-70B helicopter. The Indian Navy was represented by the indigenously built stealth frigate INS Nilgiri, ASW corvette INS Kamorta and

participating aviation assets, including P-8I and Dornier maritime patrol aircraft, Hawk Advanced Jet Trainers and MH-60R helicopters. SIMBEX has served as an important platform for strengthening bilateral maritime cooperation, operational interoperability and professional engagement between India and Singapore.

The exercise also demonstrated the commitment of both nations to enhancing maritime security and promoting stability in the Indian Ocean Region (IOR).

SHOOTING WRAPPED FOR NAVEEN CHANDRA'S 'NC 51' DIRECTED BY R.P. BALA

Chennai, 28 Oct 2026: R.P. Bala, who has made his mark in the film industry in multiple capacities as a director, producer and dubbing director, has joined hands with leading cinematographer P.G. Muthiah to produce a new film starring Naveen Chandra in the lead role.

Naveen Chandra, who earned wide spread appreciation for his impressive performance in 'Eleven', has been carefully choosing the roles he takes on. His 51st film, tentatively titled 'NC 51', is centred on a

“RUDRA DOESN'T PLAY BY THE RULES. THAT'S WHAT MAKES HER INTERESTING”: RADHIKA APTE ON NETFLIX'S AKKA

Chennai, 28 Oct 2026: Pernuru has been ruled by its women for generations, and then Rudra walks in. She is stylish, dramatic and impossible to read, and she has no interest in the order everyone else has spent a lifetime protecting. In Rudra, Radhika Apte, the actress behind Phobia, Andhadhun, Sacred Games and Lust Stories, finds a character unlike any she has played before.

“Rudra was a character that I had never played before,” says Radhika. “On the surface, she is very dramatic and stylish, but internally, there is a lot of complexity to her. That was something I found interesting.”

AI+ SMARTPHONE ANNOUNCES PRICE HIKE OF UP TO ₹3,000 ACROSS SELECT MODELS FROM NOVEMBER 15
