Make Room for the Festivities: Choose the Right Technology for a Deeper Clean

CHENNAI – 5 Nov, 2026 Chennai: Diwali cleaning involves more than a regular tidy-up, as dust, debris and hair often accumulate in hard-to-reach areas such as under beds, sofas, furniture and corners. Logan Thomson, Senior Technical Engineer at Dyson, shares key tips for choosing the right vacuum cleaner, highlighting the importance of LED illumination to reveal hidden dust, versatile cleaning tools and intelligent floor adaptation for effective cleaning across hard floors, carpets and upholstery.

The Dyson V16 Piston Animal™ features an All Floor Cones™ Sense cleaner head that removes even long hair up to 25 inches directly into the bin, preventing hair tangles. It also automatically adjusts suction power and brush bar speed according to floor types. Its fully sealed, five-stage HEPA filtration system captures 99.99% of particles as small as 0.1 microns, ensuring cleaner air is expelled back into the home.

For convenient post-cleaning maintenance, Dyson's CleanCompaktor™ bin compresses dust and debris to hold more, while its wipe-clean emptying mechanism helps ensure hygienic disposal without leaving dust or hair behind. With advanced visibility, easy reach, anti-tangle technology, intelligent cleaning, HEPA filtration and hassle-free emptying, the Dyson V16 Piston Animal™ helps make Diwali cleaning more thorough and convenient, creating a cleaner and more welcoming home for festive celebrations.
